Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 12, 14-17 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Apolinski et al. (6260279 B1).

Apolinski discloses (Fig. 1-10) the invention including first second pliers levers (1 and 2), a pivot pin 7, a handle section 10, a chamber 11, at least one spare blade 12, a handle shell 16 including a channel, said handle shell being slidable relative to said handle section (see Fig. 8), means for releasably locking said handle shell 29, a passage (see Fig. 7 and col. 3, line 25), an angle wrench 30, an anvil member 5, a cutter member 3, a base panel (see Fig. 10), a retaining panel 21, a lock device 8, a lock notch 22 and a first and second ends (see fig. 10).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3724

4. Claims 2-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Apolinski et al. (6260279 B1) in view of Khachatoorian et al. (6330749 B1).

Apolinski discloses (Fig. 1-10) the invention substantially as claimed except for a casing. However, Khachatoorian teaches the use of a casing 52 having a spring member 54, a front board 52 and a slit 52s for the purpose of preventing cutting blades from inadvertently being dislodged from the handle. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified Apolinski's device by providing the casing as taught by Khachatoorian in order to obtain a device that prevents cutting blades from inadvertently being dislodged from the handle.

5. Claims 10 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Apolinski et al. (6260279 B1) in view of Khachatoorian et al. (6502311 B1).

Apolinski discloses (Fig. 1-10) the invention substantially as claimed except for at least one ear, a guide rib and a recess. However, Khachatoorian teaches the use of an ear (42a or 42b), a guide rib (46a and 46b) and a recess (see Fig. 2) for the purpose of enhancing the frictional grip. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified Apolinski's device by providing the casing as taught by Khachatoorian in order to obtain a device that enhances the frictional grip.

Art Unit: 3724

Allowable Subject Matter

6. Claims 6-9 and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sweet, Connors, Quenot, Castelluzzo, Young, Sun, Chen, Roberts et al., Ortnier et al. and Shih et al. are cited to show related device.
